Damanhour University
Faculty of Pharmacy

A new vision for the future pharmacist

Objectives:

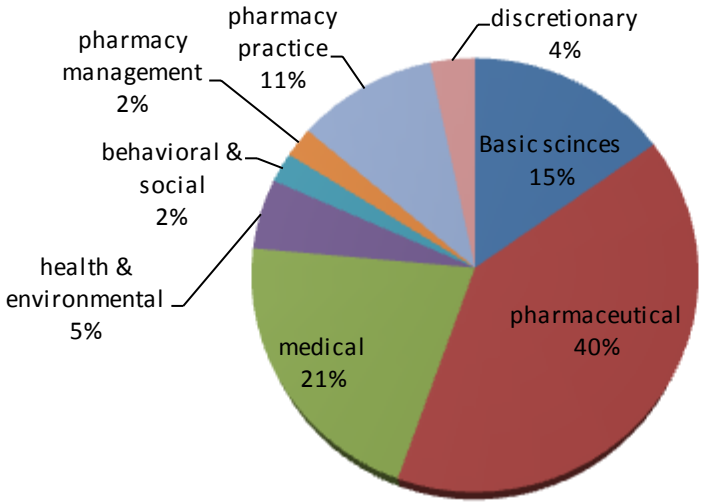
1. Preparation of qualified pharmacists with specialized knowledge, professional skills and moral values based on standard criteria.
2. Curriculum development in line with scientific progress and the labor market.
3. The establishment and support of comprehensive quality management system within the college.
4. The establishment and support of graduate studies and scientific research sector and the use of advanced technologies in the areas of research.
5. Promote community participation and linking the Faculty of Pharmacy with surrounding community.

The faculty introduces two programs for bachelor degree:

- Bachelor degree in pharmacy.
- Bachelor degree in pharmacy (Clinical Pharmacy)

The curriculum for Bachelor degree in pharmacy was developed to cope with recent advances in the modern pharmacy applying the new concept of patient-oriented pharmacy education.

The distribution of sciences is in accordance with National Academic Standard (NARS).
Graduate pharmacists have a powerful impact in the various fields of pharmacy including community pharmacies, hospitals, pharmaceutical firms, pharmaceutical industrial companies as well as, academic and research institutes.



While the **curriculum in Bachelor degree in pharmacy (Clinical Pharmacy)** is expanded focusing on the area of clinical pharmacy to provide graduate pharmacists capable of providing pharmaceutical services in all clinical environments, thereby enhancing the safe use of medicine.

Graduate pharmacists take a leading role in selection of most appropriate protocols for individual patient and offer qualified role in patient counseling and family health care.
